Description

Merrell men's shoes. Trekking shoes attract attention with their beautiful colors and trendy outdoor look. The benefit of hiking shoes is the GORE-TEX® membrane, which is water resistant and allows for excellent air ventilation. Women's mountain boots have a reinforced toe and heel for a higher level of foot protection.

A bonus of trekking shoes is the insole made of EVA material, which is also removable. The midsole provides excellent cushioning and shock absorption. Merrell Air Cushion technology contributes to stability when tackling hiking trails. The rubber sole of the trekking shoes has excellent grip and traction even in more demanding terrain. Gore-tex footwear is an excellent choice for trekking, camping, outdoor expeditions and tourist expeditions.
