Suggested retail price: 139.99 € s DPH

Description

Red Bull Spect ski goggles. The branded ski goggles have a modern design. They are suitable as women's or men's ski goggles or snowboard goggles. One of their advantages is the lightweight TPU polyurethane frame. It is highly resistant to abrasion and rapid wear. Cylindrical mirror lenses have flatter optics, but they still provide you with excellent peripheral vision. Boost lenses provide clear vision, intense contrasts and vibrant colors. Red Bull glasses use F°SCAPE Anti-Fog technology. The FREE°D technology, in turn, corrects the refraction of light so that there is no optical distortion.

The stylish snowboard goggles have an adjustable strap with the brand logo and you can customize it individually. Thanks to the internal Red Bull silicone band, the glasses stay nicely in place and are compatible with most helmets and helmets. They also provide 100% protection against UVA and UVB sunlight. A bonus is the Panotech technology, thanks to which the field of vision is wider by 15% and contributes to safety and fast reaction time.

The SOLO model has everything you would expect from ski goggles. Modern style, excellent optical properties and high wearing comfort.
