**Description**

Red Bull Spect ski goggles. Stylish ski goggles have a modern design that will please both ladies and gentlemen. Their advantage is a light and durable TPU polyurethane frame. Mirror spherical lenses are double curved. They have a similar shape to the shape of your eyes and therefore promise less optical distortion. Boost lenses provide clear vision, intense contrasts and vibrant colors. Red Bull glasses use F°SCAPE Anti-Fog technology against lens fogging. The FREE°D technology, in turn, corrects light refraction and prevents optical distortion.

Branded ski goggles are also suitable for snowboarding and match ski helmets and helmets. Thanks to the triple facial foam, they are extra comfortable to wear. The adjustable strap has the brand's logo and can be individually adjusted. Thanks to the inner silicone band, the Red Bull glasses do not slip and stay nicely in place. They also provide 100% protection against UVA and UVB sunlight.

The frameless Sight design offers better vision and better helmet compatibility. They are also suitable for wearers of prescription glasses.

**Product details:**
