### Description

Red Bull Spect ski goggles. The brand's ski goggles have a modern design that will especially please ladies. Their advantage is a light frame made of polyurethane, which is resistant to abrasion and wear. Spherical lenses use F°SCAPE Anti-Fog treatment. Boost technology ensures sharp and clear vision and vibrant colors. The FREE°D technology, in turn, corrects the refraction of light, thus preventing optical distortion. The lenses are mirrored.

Stylish women's glasses are comfortable to wear thanks to the triple face foam. The adjustable strap with the brand logo can be individually adjusted to your liking. Thanks to the internal silicone band of Red Bull, the glasses are kept in place. They also provide 100% protection against UVA and UVB sunlight.

The ALLEY-OOP model has everything you would expect from ski goggles, namely a distinctive style, excellent optical properties and high wearing comfort. The spherical lens provides a particularly wide field of view. Red Bull glasses are suitable for skiing and snowboarding.
