Description

Red Bull Spect ski goggles. Quality glasses suitable for skiing or snowboarding stand out with their modern design. The Magnetron model has a magnetic lens exchange system that is quick and practical. Red Bull glasses come with two types of lenses, Cloudy Snow and mirror Red Snow. The low weight of the glasses is also an advantage. The triple foam allows for a comfortable fit and the inner silicone strap helps keep the glasses in place.

The branded ski goggles are unisex and therefore suitable as both men's and women's ski goggles. They have cylindrical lenses made of polycarbonate, flatter optics, but still give you a wide field of vision and enable excellent peripheral vision. The F°SCAPE Anti-Fog technology, which prevents fogging of the glasses, is a real thing. The glasses also have protection against scratches and provide the necessary UV protection. FREE°D technology corrects the refraction of light, preventing optical distortion. You can comfortably adjust the ski goggles thanks to the wide strap with the brand logo. They are compatible with most ski helmets and snowboard helmets.

Product details:

- goggles for skiing and snowboarding
- modern design
