Description

Red Bull Spect ski goggles. Branded ski goggles attract attention with a modern sports design. They have cylindrical polycarbonate lenses and flatter optics, but still give you a wide field of view and allow for excellent peripheral vision.

The advantage is the F°SCAPE Anti-Fog technology, which prevents fogging of the glasses. The glasses also have protection against scratches and provide UV protection. FREE°D technology corrects the refraction of light, preventing optical distortion. You can comfortably adjust the ski goggles thanks to the wide strap with a non-slip silicone inner layer. They are compatible with most ski helmets and snowboard helmets.

Product details:

- Lightweight TPU polyurethane frame
- The frame has high abrasion resistance
- The mesh structure in the frame provides good air circulation to prevent fogging
- Two-layer foam with a comfortable face fleece layer
- Elastic strap with non-slip silicone inner layer and logo print
- Cylindrical lens with horizontal curvature provides excellent peripheral vision
- 100% UVA and UVB protection
- FSCAPE Anti-Fog drains condensed water directly from the lens surface, effectively preventing fogging
- Free-D-Tech corrects light refraction and prevents optical distortion
