Description

Arena swimming goggles. The swimming goggles have a futuristic design. The Cobra Core Swipe Mirror goggles have mirrored lenses and are FINA approved. Their anti-fog technology lasts 10 times longer. Just swipe your finger across the lenses and the fog is gone. They have a hydrodynamic design to reduce water resistance. Another advantage is the elastic and adjustable double strap, which facilitates an optimal fit thanks to the ability to apply tension to different areas of the head.

Arena glasses are suitable for competitive swimming. They will provide you with a wide field of vision, ultra comfort and less resistance at top speed. The advantage is Japanese seals - the most technological seals in terms of softness, flexibility, adaptability to any face profile and durability. Water goggles will also provide you with UV protection. They are ideal for indoor and outdoor swimming. They are also suitable as triathlon glasses. The nose piece is available in 5 different sizes for the best fit. Suitable for both men and women.
