Description

Children's skates brand Fila Skates. Roller skates for children are designed for boys. They are suitable for the smallest skaters who are just starting to learn how to skate. Fila skates have a durable, robust construction that will provide stability. The inner shoe is soft and breathable. The skates are easy to put on and fasten. They have one buckle and one Velcro strap.

Roller skates for children use MicroJem technology, thanks to which they grow with children. Their size is adjustable, so you can use them for several seasons. Boys' roller skates are also suitable as a gift.

When buying skates, we recommend buying [a spare brake](#) . The brake is worn out by braking and therefore needs to be replaced. Wear depends on skating style, braking and frequency of skate use. Brake types change and it is possible that new models differ in technical specifications from older models. New types of brakes may not fit older types of skates.
