Description

Junior skates of the brand Fila Skates. Children's skates are designed for girls. Their main advantage is the MicroJem technology mechanism, thanks to which you can adapt children's roller skates to the size of the child's foot. The mechanism allows you to adjust the length of the skates, so they grow with the children and you can use them for several seasons. Roller skates for girls can be adjusted up to 4 sizes.

Fila Skates skates for children have a robust construction with a soft comfortable shoe that is breathable. They are suitable for beginners and advanced skaters, or skaters. They have a buckle fastening and a strap with Velcro. Inline skates for children are a great gift.

When buying skates, we recommend buying [a spare brake](#) . The brake is worn out by braking and therefore needs to be replaced. Wear depends on skating style, braking and frequency of skate use. Brake types change and it is possible that new models differ in technical specifications from older models. New types of brakes may not fit older types of skates.

Product details:

- roller skates for children
- durable and robust construction
- soft and breathable inner shoe
- buckle fastening and strap with velcro
