### Description

Redmi smart watch. With its modern design, stylish watches are suitable as women's and men's smart watches. They have a compact design with a display with a diagonal of 1.47" and a resolution of 172 x 320 pixels (fineness 247 ppi). The advantage is the possibility of setting the design of the dial to your own preference from more than a hundred options.

The fitness bracelet has a thin silicone strap that adapts to you. It has a very low weight, only 26.4g. It has several functions that you can use in everyday life or during exercise. The Redmi watch does not have GPS support, but it has 5 ATM water resistance. Connection using Bluetooth 5.1.

The smart watch has a LiPO battery, 210mAh. The charging time is approximately 2 hours and with normal use they last up to 14 days. They do not support NFC. They have 192 KB of RAM and 8 MB of Norwegian Flash ROM. They are also a suitable choice as a gift for various occasions.

The smart bracelet has the following functions:

- pedometer
- calories burned
- distance covered
- measurements of more than 30 types of sports activities
- heart rate measurement
- detection of blood oxygenation level SpO2
- stress monitoring
- monitoring and evaluation of sleep
