### Description

Redmi headphones. Black headphones are a pleasant companion on the way to work, school, during free time or playing sports. Redmi Buds 4 Pro are compact and light and will provide you with perfect sound quality wherever you are. They use dual active noise suppression technology, which can eliminate external noise by up to 43 dB . Absolutely nothing disturbs you while listening. Thanks to artificial intelligence , they can recognize the type of surrounding noises and, based on this, adjust the sound exactly according to the given situation. Otherwise, they suppress ambient noise in the subway, differently in a cafe, and still differently in a library or office. These modern earphones have a built-in microphone, so they are also suitable for hands-free calling.

The Bluetooth headphones have a 10mm aluminum alloy membrane and a 6mm titanium membrane. Thanks to them, you will experience excellent sound that meets even the highest demands. The headphones also support high-resolution audio (Hi-Res Audio Wireless, LDAC codec). The high-quality battery has a long life, up to 9 hours per charge. A charging case is included in the package, which extends the duration of the headphones up to 36 hours. Fast and wireless charging functions are also supported.

The headphones with a microphone have ANC (active noise cancellation) technology, which is represented in these headphones by three levels i. It also offers a special adaptive mode , which selects the appropriate level completely automatically. You can use a light mode, which is ideal for offices or libraries, a deep mode for the subway or an airplane, and a balanced mode, suitable for cafes or sidewalks.

Bluetooth headphones also have a dual transparent mode . By long pressing the control element on the handset, sounds from the real world will start to reach you. For example, you can say hello to someone or listen to sounds and voices from the surroundings. The IP54 coverage is definitely an advantage, thanks to which Redmi headphones are resistant to dust particles, drops of water or sweat. You can use them playfully even when playing sports or exercising in difficult conditions.

Bluetooth headphones are simply controlled by touch. They can also connect two devices at the same time using Bluetooth 5.3. Android, iOS and Windows platforms are supported, and you can easily switch between them. The headphones with a microphone have IPX4 coverage, which makes them resistant to drops of water, sweat or dust particles. Charging takes place via USB-C.
