Description

Redmi headphones. You will definitely use the trendy headphones in white during your free time, on the way to work or school. They are suitable for listening to your favorite music, audiobook or podcast. Modern wireless headphones will definitely exceed your expectations. They connect to a mobile device using Bluetooth 5.2. It also offers lower audio latency, which mobile game lovers will especially appreciate. Excellent clear sound is provided by 10 mm dynamic speakers, hybrid technology of active noise suppression and long-lasting earphones. The package includes a practical rechargeable case with which the operating time is up to 30 hours. About 6 hours without a case.

The wireless headphones also have an integrated microphone, thanks to which you can make convenient hands-free calls without having to take the mobile phone out of your bag or backpack. Bluetooth headphones have sound clarity, which is ensured by special technology that uses artificial intelligence to reduce noise by up to 35dB . ANC technology - active noise cancellation - is represented in these headphones by three levels i. It also offers a special adaptive mode. It selects the appropriate level completely automatically. Light mode is ideal for offices or libraries, deep mode is suitable for subways or airplanes, and balanced mode is suitable for cafes or sidewalks.

The headphones also have a dual transparent mode . Just long press the control element on the handset and sounds from the real world will begin to reach you. For example, you can say hello to someone or listen to sounds and voices from the surroundings. The IP54 coverage is definitely an advantage, thanks to which Redmi headphones are resistant to dust particles, drops of water or sweat. Bluetooth headphones are simply controlled by touch.
