### Description

Redmi headphones. The stylish headphones are in a trendy white design. They are compact and light and you hardly feel them in your ears. They adapt to you, they don't fall out of your ears even when splurging, and they won't push you even during prolonged use. The package includes a practical charging case where you can easily store them and recharge them. Redmi headphones operate for 5 hours, which can be extended to 20 hours by using the charging case. High sound quality is ensured by 12 mm large dynamic speakers. The Qualcomm chipset and Bluetooth 5.2 technology transmit sound cleanly and realistically without distortion or delay. Thanks to Bluetooth 5.2, you can easily pair them with your mobile device and let yourself be carried away by your favorite music.

Wireless headphones have a built-in microphone, thanks to which you can also make and receive calls hands-free. The headphones are controlled intuitively with the touch of one finger. Double-click to advance playback to the next track or answer a call. Press and hold to start or pause playback. A triple tap will return to the previous track, hang up, or reject the call. The microphone can effectively eliminate ambient noise, so you will always be heard clearly and clearly, regardless of how busy the environment is. Bluetooth headphones are durable thanks to IP54 protection. They resist dust particles, drops of water or sweat.

### Product details:
