Description

Redmi headphones. Stylish headphones are a current trend that is loved by both the young and the old and will provide you with great entertainment. It doesn't matter where you are. You can use the black headphones on the way to work, on the bus or during sports. Redmi headphones have a compact ergonomic design that adapts to you. The headphones do not press, even during prolonged use. You can easily connect them to your smartphone using Bluetooth with a range of up to 10 meters. After the first pairing, they always connect to the phone automatically after removing it from the case.

The wireless headphones have a battery inside that will provide up to five hours of operation on a single charge. The package also includes a practical charging case, in which you can charge your headphones and extend their battery life up to 18 hours. The integrated microphone allows you to make hands-free calls after pairing with the phone, while you do not have to take your mobile out of your pocket or purse.

Bluetooth headphones are highly durable thanks to IP54 protection. So you don't have to be afraid to take them with you when you go jogging or to the gym. Another great advantage is that they remain fully functional even after contact with drops of water or sweat. You will definitely appreciate the powerful sound for an even better atmosphere, for example while playing games with low latency mode. The earphones do not have a volume control. You can switch between modes by touching the handset. The package also includes three sizes of earplugs (S, M, L), which allow you to adjust them individually.
