Description

Bolle junior cycling helmet. Children's helmet was inspired by the adult version of the Stance helmet and offers usable functional features for children. The bicycle helmet for children has reflective stickers and elements on the back of the helmet and on the straps. The child is thus visible in all circumstances. The children's helmet also includes an integrated net to protect against insects. The helmet for children has a safety device against getting caught on the strap. Thanks to the Click-to-Fit™ adjustable size system, you can adjust the helmet exactly according to the needs of the child's head. Thanks to the in-mold technology, the construction of the helmet is light, but durable and strong.

The children's bicycle helmet has an integrated LED light at the back for greater safety. It provides sufficient air circulation thanks to the ventilation holes and thus prevents overheating. The branded helmet for children is designed for girls. The girls' bicycle helmet is suitable for all adventures on two wheels.

Product Details:

- children's bicycle helmet for girls
- reflective elements on straps and helmet
