Description

Crocs brand footwear. Women's crocs or men's crocs are made of the patented material Croslite™. Thanks to it, they have a light construction and are highly durable. In addition, the material prevents the formation of odors and the spread of bacteria. Gray crocs stand out with the retro style Crocs™ "Crocband™". The trendy color combination is excellent for various summer outfits.

Crocs sandals have a perforated upper that contributes to comfort and sufficient air circulation. There is a strap at the back that contributes to stability during wear. Branded sandals are very easy to maintain, dry quickly and are water resistant. The advantage is the anti-slip sole. They are suitable as summer footwear for the water, the pool or during leisure time, for example in the aquacentre.
