Description

Tecnica women's shoes. Plasma outdoor shoes are durable, light and flexible. They have a breathable upper that will provide the necessary air circulation even during all-day hiking. Tecnica footwear was developed with the anatomy of a woman's foot in mind, so these trekking shoes will fit you perfectly right out of the box. They are developed for women who require more mobility in the ankle area and want to cover long distances very quickly with light luggage. Women's forest boots provide excellent traction and support on any surface. Hiking boots were designed with an emphasis on mobility in difficult terrain.

Women's low hiking shoes have their own lacing system for better securing of the feet. The rubberized tip will provide a higher level of protection in the front. The benefit of trekking shoes is the CAS insole, which adapts perfectly to the shape of the foot. The midsole with the Agile system provides excellent cushioning and shock absorption. Trekking shoes for ladies have a durable Vibram sole that convinces with perfect traction and grip. Mountain shoes are the right choice for hiking, trekking and camping.
