Description

Spokey wrist guard. Our wrists are often prone to injury and overload, especially when it comes to sports and intense training. For this reason, it is worth getting a wrist bandage, which fulfills the function of supporting and stabilizing the joints . It is an excellent choice not only for active athletes - as preventive protection during increased exertion, but also for the rehabilitation of existing injuries. Thanks to its features, the Fitband bandage:

- raises the temperature
- improves blood circulation
- accelerates the healing process

The wrist bandage is the answer to the needs of lovers of an active lifestyle. It is invaluable for joint or muscle injuries and strains - it perfectly helps relieve discomfort and pain . Thanks to its soothing heat retention and strengthening, it stabilizes and reduces the load on the elbow joint and increases the temperature, which improves blood circulation and accelerates the healing process.

The fitness bandage is made of flexible material that allows the skin to breathe, so you don't have to worry about excessive sweating. The fabric perfectly wicks away moisture, preventing the formation of abrasions, bruises or blisters. At the same time, the wrist bandage is very flexible - it allows optimal adaptation of the bandage to the anatomy of your wrist. Thanks to the materials used, the bandage does not slip during wear, does not press anywhere and does not restrict movement . In addition, the bandage is very easy to maintain and clean , so it will keep you company for a long time. You can use it as a prevention against injuries, as protection against muscle or joint overload, or as support during strength training.

Recommendation:

Make sure that the bandage is not too tight to allow free blood circulation.

Do not use the bandage after you have applied warming ointment or emulsion to the affected part of the body.
