Description

VoXX brand socks. Trekking socks absorb moisture very well. Socks for the mountains reach about half the calf. The classic height of hiking socks is suitable for every type of foot. The advantage of trekking socks is the soft knit, which provides super comfort when wearing. The socks belong to temperature class B: from -5°C to + 20°C.

Hiking socks are made of silproX material, which contains silver ions. Thanks to this material, nature socks have antibacterial properties. The fabric of the mountain socks has a high proportion of cotton. Natural cotton fiber excellently wicks away sweat. Black socks are perfect companions for hiking trails, trekking and outdoor adventures. Also suitable for running, walking, indoor sports and everyday wear.
