Description

Volcano women's leggings. Classic black leggings are made of pleasant material with a striped structure. They have a proportion of elastane, thanks to which they are flexible and adapt to your figure. The Slim Fit cut nicely accentuates women's curves. Sports leggings have a high waist, which is wide enough and supports movement.

Women's striped leggings have versatile uses. They can be worn for sports and in the city as streetwear. The minimalist design makes it easy to match them with different sports styles. You can combine them with an oversize sweatshirt or crop top and you will always create a great style. The advantage of sports leggings is also their quick-drying material.

Product details:
