Description

Fila men's roller skates. Despite their low weight, roller skates have high performance, stability and durability. They meet demanding technical standards. In-line skates have a shock absorber in the heel area.

The aluminum frame is equipped with 4x80 mm wheels for optimal handling and control. The inside of inline skates provides excellent comfort while skating. The skates offer the possibility to exchange 4 wheels for 3 wheels.

The difference between 3-wheel and 4-wheel skates:

Larger wheels (3-wheel skates) rotate less times to cover the same distance as smaller wheels (4-wheel skates), so they have a higher maximum speed. They have less rolling resistance than 4 smaller wheels, which leads to an increase in speed.

When buying skates, we recommend buying [a spare brake](#) . The brake is worn out by braking and therefore needs to be replaced. Wear depends on skating style, braking and frequency of skate use. Brake types change and it is possible that new models differ in technical specifications from older models. New types of brakes may not fit older types of skates.

Product details:

- Frame: aluminum - Aluminum 6000
- Wheel size: 80 mm
- Wheel hardness: 82A
- Bearings: ABEC 7
- Molded padding
- Double wheel setting - 3 or 4 wheels
