Description

Grisport men's shoes. The design of the trekking shoes is inspired by the forest and nature. The upper part of the trekking shoes is a combination of suede and synthetic material for a higher level of air circulation. Hiking shoes are designed and made for walks of all levels of difficulty, from pleasant walks through medium-difficult hiking to longer, more demanding hikes.

Internal padding and a soft insole provide lightness and comfort to the boot for the forest. The Grisport GRITEX® membrane keeps the feet warm and dry, despite the rain and adverse weather. The articulated sole of the trekking shoes is non-slip. A great choice for all hiking enthusiasts.
