Description

Boy's helmet brand Fila Skates. A high-quality and functional helmet in a modern design intended for roller skating, skateboarding, cycling or other sports with an increased risk of head injury. It is made by In-Mold technology, by direct injection of polyester into the skeleton. This achieved excellent strength and at the same time low weight.

The helmet is equipped with ventilation holes with a net against the ingress of insects, a comfortable inner lining and a safety fastening with the possibility of setting the exact circumference of the head area.

Product details:

- In-Mold technology
