### Description

Skate protectors from Fila Skates. The set of inline protectors includes protectors for knees, elbows and wrists. The protectors for roller skates have an anatomical shape, thanks to which they fit very well on the wrists, elbows and knees. Protectors for both ladies and gentlemen have a trendy look that will please all skaters.

The inner part of the skate protectors is made of soft and breathable material, which ensures comfort when wearing. The outer part of the in-line protectors is made of a strong and durable material that protects in the event of a fall. Skate protectors are ideal companions for skating.

### Product details:

- anatomical shape
- modern design
