Description

Unisex knee socks from the brand Blizzard. Compression ski knee socks are equipped with soft anatomical padding that helps prevent bruises and blisters. Compression supports blood flow in the circulatory system and thus helps to improve sports performance and regeneration.

Knee socks have a high proportion of polyamide. It is a soft and durable microfiber that strengthens the structure of the entire knit.

Materials used:

Polypropylene: Thanks to its high water repellency, strong thermal insulation ability and low weight, it is ideal for the production of functional sports clothes. It ensures fast transport of moisture and quick drying during sports activities.

Polyamide: This is a soft and durable microfiber that strengthens the structure of the entire knit, ensures its long-term durability and at the same time maintains a pleasant touch

Product details:

- compression knee socks
- compression ensures:
 - improving blood flow
 - muscle support and reduction of unwanted vibrations
 - protection against muscle fiber damage
 - faster regeneration
- good drainage of sweat from the skin
- good thermal insulation capabilities
