Description

Unisex knee socks from the brand Blizzard. Ski socks with Merino wool are a guarantee of comfort and great sports performance.

Black socks with red elements are equipped with a highly elastic cuff and reinforced parts in the most stressed areas. The use of high-quality Merino wool brings excellent thermal insulation properties in the heel and toe, which at the same time keeps the skin dry. The inserted foot part made of modified ClimaWell polypropylene improves the antibacterial properties of the product thanks to silver ions.

Materials used:

Merino wool: The use of high-quality merino wool in the heel and toe significantly increases the thermal comfort of the product. The toes in particular are kept much warmer and drier thanks to this natural insulator.

ClimaWell: Polypropylene fiber with implemented silver ions. The silver in the fiber helps to prevent the unwanted growth of bacteria and fungi and thus helps to optimize the microclimate of the skin.

Polyester: The fiber conducts moisture very well and dries quickly. Thanks to its softness, it gives the products a pleasant and soft touch, therefore it is used in products that will be in contact with the skin for a long time.

Polyamide: This is a soft and durable microfiber that strengthens the structure of the entire knit, ensures its long-term durability and at the same time maintains a pleasant touch

Product details:

- reinforced area of the shin, ankle and heel
- elastic zones
- denser fibers in the foot area
- better protection in the toe and heel area

Material:

- 42% cotton, 25% polyamide, 17% polyester, 9% merino wool, 5% polypropylene, 1% elastane, 1% polyurethane
