Description

Grisport men's shoes. Outdoor shoes stand out for their high-quality design and functionality. Trekking shoes have a higher cut that ensures excellent stability. The high-quality leather upper is a guarantee of durability. Hiking boots have a Gritex membrane that protects the feet. The advantage of trekking shoes is also the Support system, which strengthens the ankle.

Trekking shoes have a reinforced toe for better protection. Of course, the Vibram sole is a guarantee of durability. The More III model in dark brown color is intended for tackling hiking trails. Outdoor footwear is a great choice for trekking, hiking, outdoor activities and walks in nature.
