### Description

Adidas originals men's shoes. The adidas Equipment support sneakers in white have a trendy, sporty look. The design of the silhouette of the shoe was inspired by a model line from the 90s of the 20th century.

There are also characteristic three side stripes in a modern design. The upper is a combination of mesh and synthetic material for better breathability. The Boost <sup>™</sup> midsole returns energy and provides excellent support.

Men's boots are a great choice for training, sports and leisure activities. They are also suitable for the fitness center.

### Material:

- upper: textile and synthetic material
- inside: textile
- sole: synthetic material
