Description

Arena swimming goggles. Swimming goggles are a great aid for swimmers. Arena glasses have lenses adapted for wider and frontal vision. The One glasses are black and have a bifurcated silicone rubber band that ensures greater comfort. The branded glasses have clips on the sides that ensure quick and easy adjustment of the elastic band.

Another benefit is that they have a self-adjusting beam. Practical glasses have a hydrodynamic shape and low-profile lenses. Polycarbonate lenses provide UV protection and do not fog up thanks to anti-fog technology. The seal is made from one piece of material. They are an ideal solution for all swimmers and are also suitable for triathlon.
