Description

Fila skates helmet. The protective shell of the NRK Fun helmet is made of the most modern materials and protects the head area against possible impact caused by a fall.

The helmet is made with In-Mold technology - direct injection of polyester into the skeleton, which achieves excellent strength. The white helmet is equipped with a comfortable inner lining and a safety fastening with the possibility of adjusting the exact coverage of the head area. Quality materials, a high standard of safety and a sophisticated shape are the features that rank this helmet among the elite.

Material:

- synthetic material
