Description

Trezeta women's shoes. The Glitter WP trekking shoes are comfortable, versatile and light. Hiking boots are specially developed for women's feet, ideal for hikers who want to tackle long mountain routes, even at medium altitudes and on uneven surfaces.

The durable suede upper of trekking shoes is a guarantee of excellent breathability. The ergonomic lacing of the hiking boots enables an optimal fit around the foot. The advantage of outdoor shoes for ladies is anatomical padding. The Trezeta Water Stopper membrane prevents the penetration of moisture towards the foot, which allows dryness in trekking shoes. The shaped insole made of eva material provides comfort when wearing. Alpine boots are the right choice for all women who love hiking.
