Description

Kayland women's shoes. Versatile shoes for more demanding hiking, even on routes where you take a heavy backpack. Women's hiking shoes in beautiful bright colors - a combination of brown and blue form a fusion of the traditional appearance of hiking shoes and modern shoes. Their upper is made of durable, protective suede, combined with a modern higher collar with technical fabric inserts and polyurethane applications that strengthen the entire structure without weighing it down.

Trekking shoes for ladies are lightweight thanks to the dual-density EVA midsole, light and flexible, ideal for mixed uneven terrain where heavy backpacks are carried. The Vibram Multiverse Hike sole has higher and multi-positioned lugs for better dirt removal and traction, while the toe and lugs are wide for excellent traction when walking uphill or downhill.
