Description

Kayland men's shoes. Alpha outdoor shoes will attract attention with their modern appearance and excellent functional properties. They are a guarantee of performance and support during trekking. Men's hiking boots with asymmetric lacing for excellent foot coverage and very good foot fixation. Boots for the forest are designed with an emphasis on foot ergonomics. The upper part of the hiking shoes is made of durable suede. The sides of the hiking boots are very finely perforated for a higher level of breathability.

The padded collar and tongue of the trekking shoes ensure comfort when tackling hiking trails. A soft insole will also contribute to comfort. The toe and heel are reinforced with additional material for better protection of the foot. The Gore-Tex® Extended Comfort membrane creates an effective barrier and ensures excellent water resistance and dryness in mountain boots. The midsole of the trekking shoes ensures cushioning and shock absorption. The durable and grippy Vibram sole easily conquers rocky terrain. Kayland trekking shoes are the right choice for walks in nature, trekking, hiking expeditions and outdoor adventures.
