Description

Kayland women's shoes. Alpha hiking boots for women are designed in a trendy outdoor design. They surprise with excellent functional properties. They are a guarantee of performance and support during trekking. Outdoor shoes with asymmetric lacing for excellent foot coverage and very good foot fixation. Boots for the forest are designed with an emphasis on foot ergonomics. The upper part of the hiking shoes is made of durable suede. The sides of the trekking shoes are very finely perforated for a higher level of breathability.

The padded collar and tongue of the trekking shoes ensure comfort even during demanding hiking. A soft insole will also contribute to comfort. The tip and heel are reinforced with several layers of material for better protection of the foot. The Gore-Tex® Extended Comfort membrane creates an effective barrier and ensures excellent water resistance and dryness in mountain boots. The midsole of the trekking shoes ensures cushioning and shock absorption. The durable and grippy Vibram sole easily conquers rocky terrain. Shoes for ladies are an ideal choice for walks in nature, trekking, hiking expeditions and outdoor adventures.
