Description

Kayland men's shoes. Men's hiking boots with a light and comfortable design designed for three-season use. Hiking shoes with red decorative stitching will ensure optimal comfort in all types of terrain thanks to the Vibram ® sole, which will carry you through all obstacles or slippery terrain. Mountain shoes have a microporous foam midsole, which guarantees foot comfort during the entire hike. Waterproof boots for the forest will keep your feet dry thanks to the Gore-Tex ® membrane and you will enjoy the hike

Men's hiking boots have a higher ankle cut with classic binding up to the ankle part, which firmly fixes the foot in the shoe. The reinforced sides of the shoes, the heel and the triple protection of the tip with a rubber overlap will come in handy in wet, demanding terrain. Ankle boots have a padded tongue and the ankle part will not miss you anywhere and will provide good fixation.
