Description

Kayland women's shoes. Hiking boots for ladies with a light and comfortable design designed for use in three seasons. Hiking shoes with pink elements ensure optimal comfort in all types of terrain thanks to the Vibram® sole, which will carry you through difficult and slippery terrain. Mountain shoes have a cushioning foam midsole, which guarantees foot comfort during the entire hike. Waterproof boots for the forest will keep your feet dry thanks to the Gore-Tex® membrane and you will enjoy the hike

Women's hiking shoes are of a higher cut with classic binding up to the ankle part, which firmly fixes the foot in the shoe. High boots for hiking have reinforced sides of the shoes, heel and triple protection of the toe with a rubber overlap, which will come in handy in wet, demanding terrain. Trekking shoes have a padded tongue and the ankle part will not miss you anywhere and will provide good fixation.
