### Description

Skates of the brand Fila skates. Quad skates impress with their classic yet refined and elegant design. Eve up roller skates are characterized by an ergonomic construction with a reinforced synthetic surface and an anatomically shaped tongue.

Double-row skates have an aluminum chassis and a polyurethane front brake. The advantage of 4-wheel skates is the anatomically shaped padding in the ankle area. The lining of the double-row roller skates is made of synthetic fabric with reinforced ankle padding. White roller skates are a great choice for all skating enthusiasts who love retro style.

When buying skates, we recommend buying [a spare brake](#) . The brake is worn out by braking and therefore needs to be replaced. Wear depends on skating style, braking and frequency of skate use. Brake types change and it is possible that new models differ in technical specifications from older models. New types of brakes may not fit older types of skates.

### Product details:

- Chassis: aluminum composite
- Wheel size: 58 x 32 mm
- Wheel hardness: 80A
