### Description

Trezeta men's shoes. Shan winter boots have a higher cut, which is a guarantee of better stability and at the same time protection against the cold. Light and robust at the same time, the men's winter boots offer excellent performance in the most demanding winter activities. The upper part of the winter footwear made of textile and PU has a water-resistant surface treatment. The advantage of men's shoes is the Water Stopper technology. The three-layer membrane protects the foot from the outside from snow and bad weather and allows the foot to breathe thanks to the mesh layer.

The heat-insulating inner lining of the winter boots is ideal for keeping your feet warm during long-term exposure to harsh weather thanks to Heat Saver technology combined with anatomical padding that maximizes comfort. The Vibram sole guarantees excellent traction and grip on snowy, bumpy, muddy or icy surfaces. Black shoes are excellent companions for everyday wear in winter.
