Description

Trezeta women's shoes. Shan winter boots in a modern design appeal with excellent technical performance. Snow boots have a higher cut, which is a guarantee of better stability and at the same time protection against the cold. Light and robust at the same time, women's winter boots offer excellent performance in the most demanding winter activities. The upper part of the winter footwear made of textile and PU will delight with its waterproof finish. The advantage of men's shoes is the Water Stopper technology. The three-layer membrane protects the foot from the outside from snow and bad weather and allows the foot to breathe thanks to the mesh layer.

Women's winter footwear keeps feet warm thanks to the insulating inner lining. Anatomical padding inside the shoes for ladies ensures comfort even during all-day wear. The Vibram sole guarantees excellent traction and grip on snowy, bumpy, muddy or icy surfaces. Black-purple shoes are excellent companions for everyday wear and leisure time in the winter season.
