Description

Snowboard pants from the brand Protest. The snowboard pants have a universal beige color and a functional cut. The main advantage is the membrane with a water column of 4,000 mm and breathability of 4,000 g/m²/24h, so they will protect you even in rain and snow. Protest trousers have an adjustable waist with Velcro fasteners. You can customize them as needed. The removable braces, which you may or may not wear, are also an advantage.

Waterproof snow pants have many practical pockets. Two side pockets with zipper, one double pocket on the thigh and one back pocket with zipper. The brand's men's snowboarding pants also have internal snow cuffs that keep snow out and keep the pants firmly on the ski boots.
