Description

The cycling soul of the Chaoyang brand. A light and at the same time strong inner tube that provides optimal performance, is resistant to frost and overheating. The bicycle inner tube is made of synthetic butyl rubber with a wall thickness of 0.90 mm.

The material provides excellent elasticity in tension, which means that the bicycle inner tube perfectly adapts to the shape of the tire. The density of the material, in turn, provides excellent resistance to air leakage. The inner valve is made of high-quality materials that extend the life of the inner tube. The soul is packed in a paper box.

Product details:

- light and strong
- resistant to frost and overheating
- excellent flexibility: 0.90mm
- wall thickness: Weight: 142 g
