Description

Boot doc shoe insoles. The basic universal concept of the 3-Arch insole is suitable for all dynamic sports.

The size is indicated in mondopoint (in mm). For example size 240 is 240 mm=24 cm).

Product details:

- Microfiber-Jersey material with anti-odor function
- Very light, breathable insole with an attractive design

Advantages of Boot Doc insoles:

- they take into account the individual foot type according to the arch
- they take into account the imbalance of the left and right foot
- they help the even distribution of pressure and thus limit the formation of pressure sores
- excellent shock absorption
- they optimize the transmission of forces during movement
- they stabilize the foot and thereby reduce the risk of injury, protect ligaments, tendons and muscles
- they improve the posture of the whole body
