Description

Under Armor fitness gloves. Fitness gloves in a distinctive orange-black color made of durable textile material on the upper side of the gloves. Fingerless gloves have a surface made of leather material on the palm, which guarantees better protection and grip. UA CoolSwitch technology uses an exclusive coating on the inside that wicks heat away from the skin. This guarantees comfort for long periods of exercise.

Holes on the upper side of the palm increase breathability, and the elastic band on the lower side ensures easy dressing and a good fit on the hand. The gloves are suitable for various sports activities.

Product details:

- Modern color combination
- Cut without thumbs
- Anti-slip coating on the palm
- Elastic cuffs with a wide waist
- Breathable and sweat wicking
