Description

Voxx hiking socks. Warm socks with padded zones against blisters and bruises. Hiking socks with a soft, comfortable tight hem provide high breathability and comfort during wear. Shaped socks are anatomically adapted for the left and right foot. Terry socks for hiking have antibacterial protection with silver ions, which is ensured by the silproX material. You will definitely like high socks for hiking boots.

Winter socks for maximum thermal comfort thanks to Merino wool, which perfectly wicks away moisture, dries quickly, lets the skin breathe, is comfortable even when worn all day, is hypoallergenic and antibacterial. Merino socks Voxx Etrex in the classic height are a suitable choice for winter hiking, mountain hiking, trekking, walking or other leisure activities in the winter season. Socks belong to temperature class C: from -20°C to +5°C.
