Description

Treatment preparation of the Ademm brand. The universal product PROTECT LEATHER SPRAY is used to impregnate and maintain functional clothing. Multi-purpose preparation for shoes and clothes serves to preserve functions and extend their lifespan. Protect Leather spray is specially designed for leather and waxed textiles and shoes.

Product details:

- Care and maintenance of material
- It ensures that the material is extremely resistant to water
- It ensures that functional clothing has good breathability
- Safe spray nozzle for better application of wax to the material

Application: Before use, shake well and spray on a clean and untreated surface from a distance of about 25 cm. Gently wipe with a soft absorbent cloth on the applied surface (immediately after application) and let it dry. It is recommended to first make a small test application in an invisible area of the garment to test compatibility. The product is supplied in a 250 ml spray bottle with a removable nozzle. We recommend ADEMM PROTECT LEATHER SPRAY to everyone who wants to take care of their clothes and shoes.
