Description

Women's footwear by Tecnica. Outdoor shoes Plasma W GTX are durable, light and flexible. The main advantage of hiking shoes is the Gore-tex membrane, which is a guarantee of water resistance. Women's hiking boots provide great traction and support. Hiking boots were designed with an emphasis on mobility in difficult terrain. Shoes for ladies appeal with a timeless design. In addition, they are very comfortable thanks to the inner padding.

The benefit of trekking shoes is C.A.S. an insole that adapts perfectly to the shape of the foot. The midsole with the Agile system provides excellent cushioning and shock absorption. Trekking shoes for ladies have a durable Vibram sole that convinces with perfect traction and grip. Mountain shoes for women are the right choice for hiking trails, outdoor activities, trekking and camping.
