Description

Ziener brand gloves. The Cornelis Touch cycling gloves were specially developed for cooler transition temperatures. A special feature of the cycling gloves is the windproof, breathable and water-repellent WINDSHIELD® membrane on the back of the hand, which prevents the hand from getting cold. Bicycle gloves are made of light and elastic material.

Thanks to the combination of durable, quick-drying and breathable AX™ SUEDE material and a non-slip surface, these gloves offer the best grip on the handlebars. The close-fitting cuff with Velcro fastening ensures a good "fit" on the wrist. Velcro significantly increases ease of use. Another smart element are decorative, reflective elements.

Product details:

- Conductive special fabric on the fingers of the gloves, which ensures optimal use of devices with a touch screen
- windproof, breathable and water-repellent membrane WINDSHIELD®
- anti-slip surface
- reflective elements
- velcro fastening
