Description

Voxx running compression knee socks. Compression knee socks will be appreciated both when running and when doing office work or feeling "heavy legs"! They have a special construction for your health. Knee socks have a positive effect on blood circulation, thanks to the stepped massage pressure. They are especially suitable where there is a heavy load on the lower limbs. For example, runners or skiers. Knee socks for running are in a beautiful neon-orange color with a checkered inconspicuous pattern.

During strenuous sports, muscle regeneration occurs quickly, thanks to increased blood flow and higher oxygenation of the muscles. Lithe compression knee socks are suitable for various types of sports, when standing for a long time, respectively sitting at work, long-term travel in various means of transport. They are also suitable for expectant mothers and the use of healthcare. Also as a prevention against varicose veins and feelings of so-called "heavy legs". Socks belong to temperature class A: from +10°C to +35°C.
