Description

Kayland men's shoes. Hiking boots for men bring a new concept of comfort and performance. The Cross Mountain GTX trail shoe has been developed to offer versatile performance in mixed terrain, including mountain slopes with technical and rocky transitions, snow and ice, and ready for use with cats. Hiking shoes offer the perfect compromise between light weight and technical features.

Men's hiking shoes offer guaranteed safety and performance for anyone who wants to use the same shoes for mountaineering and trekking. Ideal for mountain climbing professionals, guides and rescuers in flight. The upper is made of split leather and ultra-high technology against abrasion with attractive colors and design - black with distinctive orange elements. Ankle Lock technology to protect the ankle guarantees the stability of the foot. The Gore-Tex® Performance Comfort membrane protects your feet from rain, stones and moisture while ensuring maximum breathability. Trekking shoes for men have a microporous midsole with a long life and shock absorption. Vibram® Mulaz EVO 5 mm tread offering excellent grip on the way up and down. Trekking shoes are a great choice for demanding terrains and professionals.
