Description

Tecnica men's shoes. Light trail shoes for experienced runners will be a great partner when tackling challenging running routes in nature. Magma S shoes are designed specifically for light hiking, trail running and climbing in all kinds of technical mountain terrain. These are all-mountain trail shoes. They provide a new level of stability on different surfaces, protection of the feet and the benefits of light and breathable footwear. You can easily adjust the trail running sneakers thanks to the classic lacing and the shoes adhere very well to the foot.

Terrain All-mountain boots have a unique pattern inspired by MTB tires, a sole with Vibram Litebase technology and a Megagrip compound. It is a rubber that offers exceptional grip on all surfaces, both dry and wet. Outdoor running sneakers have an ultra-large heel shape thanks to two rubber stabilization ribs on the sides of the heel. Running

shoes will provide you with unrivaled braking efficiency, even on rubble or gravel. The midsole rocker has a unique rounded toe shape, which increases the reactivity of the shoes, their acceleration and braking. These trail shoes can be molded to fit the runner in the heel and arch area. The shoe has a pre-shaped inner insole.
